MATERIAL SAFETY DATA SHEET

Section 1- PRODUCT IDENTIFICATION

<table>
<thead>
<tr>
<th>COMPOSITION</th>
<th>PRODUCT NAME</th>
</tr>
</thead>
<tbody>
<tr>
<td>SnO2</td>
<td>Tin Oxide Powder and Pieces</td>
</tr>
</tbody>
</table>

Section 2- HAZARDOUS INGREDIENTS

Note: Products under normal conditions do not represent an inhalation, ingestion or contact health hazard.

<table>
<thead>
<tr>
<th>MATERIAL OR COMPONENT</th>
<th>CAS NUMBER</th>
<th>WT%</th>
<th>EXPOSURE LIMITS</th>
</tr>
</thead>
<tbody>
<tr>
<td>Tin Oxide</td>
<td>18282-10-5</td>
<td>0.0-100.0</td>
<td>2mg/m3</td>
</tr>
</tbody>
</table>

Section 3- PHYSICAL DATA

<table>
<thead>
<tr>
<th>MATERIAL IS (AT NORMAL CONDITIONS)</th>
<th>APPERANCE AND ODOR</th>
<th>SPECIFIC GRAVITY</th>
</tr>
</thead>
<tbody>
<tr>
<td>Liquid □ Solid □ Gas □ Other</td>
<td>White powder and pieces, no odor</td>
<td>6.95gm/cc</td>
</tr>
<tr>
<td>MELTING POINT (BASE METAL)</td>
<td>1630.0C</td>
<td></td>
</tr>
</tbody>
</table>

Section 4- FIRE AND EXPLOSION

<table>
<thead>
<tr>

</table>

EXTINGUISHING MEDIA

N/A. Use suitable extinguishing agent for surrounding materials and type of fire.

SPECIAL FIRE FIGHTING PROCEDURES

Firefighters must wear full face, self-contained breathing apparatus with full protective clothing to prevent contact with skin and eyes. Fumes from fire are hazardous. Isolate run-off to prevent environmental pollution.

UNUSUAL FIRE AND EXPLOSION HAZARDS

When heated to decomposition, tin oxide may emit acrid smoke and irritating fumes.

Section 5- REACTIVITY DATA

<table>
<thead>
<tr>
<th>STABILITY</th>
<th>INCOMPATABILITY (MATERIALS TO AVOID)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Stable</td>
<td>Aluminum, Potassium, Magnesium, Sodium, CIF3, HS3.</td>
</tr>
</tbody>
</table>
### CONDITIONS TO AVOID

| None |

### HAZARDOUS DECOMPOSITION PRODUCTS

| Tin and SnO2 |

### Section 6- HEALTH HAZARD GUIDE

#### MAJOR EXPOSURE HAZARD

- □ Inhalation  □ Skin  □ Skin Absorption  □ Eye Contact  □ Ingestion

#### EFFECTS OF OVEREXPOSURE

Tin compounds have variable toxicity. Elemental tin and inorganic tin compounds have low toxicity and are poorly absorbed when ingested. Some inorganic tin salts are irritating or can cause liberate toxic fumes on decomposition. The latter is particularly true of tin halogens. (Sax, Dangerous Properties of Industrial Materials, eighth edition)

**INHALATION**: Acute; may cause irritation of the upper respiratory system. Chronic; may cause pneumoconiosis.

**SKIN CONTACT**: Acute; may cause irritation. Chronic; None recorded.

**EYE CONTACT**: Acute; may cause irritation. Chronic; None recorded.

**INGESTION**: Acute; Poor absorption makes it relatively non-toxic. Chronic; None recorded.

**TARGET ORGANS**: May affect respiratory system.

#### EMERGENCY & FIRST AID PROCEDURES

**INHALATION**: Remove victim to fresh air; keep warm and quiet and seek medical attention.

**SKIN CONTACT**: Remove contaminated clothing from affected area; brush material off skin. Wash affected area with mild soap and water. Seek medical attention if symptoms persist.

**EYE CONTACT**: Flush eyes with lukewarm water, lifting upper and lower eyelids, for at least 15 minutes. Seek medical attention if symptoms persist.

**INGESTION**: Give 1-2 glasses of milk or water and induce vomiting. Seek medical attention. Never induce vomiting or give anything by mouth to an unconscious person.

### Section 7- SPILL OR LEAK PROCEDURES

**Wear appropriate protective equipment specified in section 8. Isolate spill area and provide ventilation. Scoop or vacuum the spill using high efficiency particulate absolute (HEPA) air filter and place in a closed container for proper disposal. Take care not to raise dust.**

**WASTE DISPOSAL METHODS**

Observe all federal, state and local regulations when storing or disposing.

### Section 8- SPECIAL PROTECTION

**RESPIRATORY**

NIOSH-approved dust respirator.

**VENTILATION**

Local exhaust: Maintain concentration at or below PEL, TLV.

**EYE PROTECTION & PROTECTIVE CLOTHING**

Safety glasses, rubber glover and protective gear suitable to prevent contamination.
Section 9- SPECIAL PRECAUTIONS

Implement engineering and work practice controls to reduce and maintain concentration of exposure. Handle in controlled inert atmosphere. Minimize exposure of cadmium by local exhaust and enclosing process if/when possible. Use good housekeeping and sanitation practices. Do not use tobacco or food in work area. Wash thoroughly before eating or smoking. Shower and change clothes at the end of workshift. Do not blow dust off clothing or skin with compressed air.

Some of the chemicals listed herein are research or experimental substances which may be toxic, as defined by various governmental regulations. In accordance with Environmental Protection Agency regulations and the Toxic Substance Control Act (TSCA), these materials should only be handled by, or under the direct supervision of, a “technically qualified individual”, as defined in 40 CFR 710.2(aa).

The information in this MSDS was obtained from sources, which we believe are reliable. However, the information is provided without any representation or warranty, express or implied, regarding the accuracy or correctness.

The conditions or methods of handling, storage, use and disposal of the product are beyond our control and may be beyond our knowledge. For this and other reasons, we do not assume responsibility and expressly disclaim liability for loss, damage or expense arising out of or in any way connected with the handling, storage, use or disposal of the product.
