EXTINGUISHING MEDIA

DO NOT USE WATER ON METAL FIRES – Use dry chemical, CO2, sand, graphite

SPECIAL FIRE FIGHTING PROCEDURES

Requires full face self contained breathing apparatus with full protective clothing to prevent contact with skin and eyes.

UNUSUAL FIRE AND EXPLOSION HAZARDS

Material may emit toxic fumes if involved in a fire. Moderate fire and explosion hazard in the form of a fine powder or dust when exposed to heat, flames or sparks. The dry powder ignites spontaneously in air. Reacts with fluorine, chlorine and oxygen only on heating. At high temperatures absorbs several hundred times its volume of hydrogen. Although very un-reactive in massive form, the finely divided metal may be pyrophoic.
Section 5- REACTIVITY DATA

**STABILITY**  
Unstable  

**INCOMPATABILITY (MATERIALS TO AVOID)**  
BrF₃, F₂, Lead Chromate

**CONDITIONS TO AVOID**  
Air, heating, sparks, flames, incompatible materials.

**HAZARDOUS DECOMPOSITION PRODUCTS**  
Ta₂O₃

Section 6- HEALTH HAZARD GUIDE

**MAJOR EXPOSURE HAZARD**

- Inhalation
- Skin
- Skin Absorption
- Eye Contact
- Ingestion

**EFFECTS OF OVEREXPOSURE**

**INHALATION:** May be irritating to the respiratory tract and mucous membranes. Sneezing, coughing, difficulty breathing.

**SKIN CONTACT:** Irritation, redness, inflammation may occur. Dermatitis is possible.

**EYE CONTACT:** Irritation, redness, watering, inflammation possible. Risk of serious injury.

**OTHER:** An experimental equivocal tumorigenic agent. Some industrial skin injuries from tantalum have been reported. However, systemic industrial poisoning is apparently unknown.

**MEDICAL CONDITIONS GENERALLY AGGRAVATED BY EXPOSURE:** Respiratory disorders, skin disorders.

**CARCINOGENICITY:** None   NTP? No   IARC Monographs? No   OSHA Regulated? No

**EMERGENCY & FIRST AID PROCEDURES**

**INHALATION:** Remove victim from exposed area to fresh air. Give oxygen if breathing is difficult and seek medical attention.

**SKIN CONTACT:** Remove contaminated clothing and shoes immediately. Brush material off skin and wash affected area with mild soap and water. Seek medical attention.

**EYE CONTACT:** Flush eyes with lukewarm water, lifting upper and lower eyelids for at least 15 minutes. Seek medical attention.

**INGESTION:** Give 1-2 glasses of milk or water and induce vomiting; seek medical attention. Never induce vomiting or give anything by mouth to an unconscious person.

Section 7- SPILL OR LEAK PROCEDURES

**SPILL OR LEAK PROCEDURES**

Wear a self contained breathing apparatus and full protective clothing. Isolate the area where the spill occurred and ensure that proper ventilation is available and that water/moisture is kept out of the area. Vacuum up spill using a high efficiency unit and place in a container for proper disposal. Take care not to raise dust.

**WASTE DISPOSAL METHODS**

Observe all federal, state and local regulations when storing or disposing of this substance.

Section 8- SPECIAL PROTECTION

**RESPIRATORY**

NIOSH approved dust-mist-fume cartridge respirator.

**VENTILATION**

Maintain exposure below TLV.
Special: None                      Mechanical: Recommended                     Other: None

EYE PROTECTION & PROTECTIVE CLOTHING
Use safety glasses. Wear neoprene protective gloves. Use protective gear suitable to prevent contamination.

Section 9- SPECIAL PRECAUTIONS

Handle in a dry, inert atmosphere.

Toxicity Data: impart TDLO: 3760 mg/kg

The information in this MSDS was obtained from sources, which we believe are reliable. However, the information is provided without any representation or warranty, express or implied, regarding the accuracy or correctness.

The conditions or methods of handling, storage, use and disposal of the product are beyond our control and may be beyond our knowledge. For this and other reasons, we do not assume responsibility and expressly disclaim liability for loss, damage or expense arising out of or in any way connected with the handling, storage, use or disposal of the product.
